First-class interior protection

Our products safeguard secure protection against damages and stains – even in very sensitive car interiors.

High class materials with workshop oriented properties efficiently guarantee protection in special applications. For example antistatic polyethylene, or anti-slip undersurfaces for seat covers.

Different colours signalise special properties and help to identify the right special cover.

Most of our interior protection products are available on a handy compact roll.

Our wall bracket allows clean, tidy and central storage of a great diversity of products.

Fibreglass covers for car body repairs

Our well-proven fibreglass covers reliably prevent damages by sparks and metal drops.

Tailored protection is available for every vehicle, based on the type and scope of the grinding or welding work. This is guaranteed by six different sizes and shapes. On demand we will be glad to sew individual covers for your needs.

All our fibreglass covers are made of a robust fibreglass fabric with a special protective coating. This material can withstand temperatures up to 700 °C.

Special shapes and robust suction cups or belt straps allow a secure fixation on and inside the vehicle.
