Protection for rear and entry

Cover for entry plate and rear end for Volvo

O/N: D-VO 12

This covers protects the entry plate and the rear end during repair and maintenance. With extra strong sandwich padding for reliable protection during the installation and the removal of heavy front seats. Non-scratch attachment without magnets by fibreglass rod and several Velcro straps. Variable height by means of Velcro adjustment. Made of foam-coated artificial leather. With white imprint of the Volvo logo to support the workshop's image.

Size: about 60 × 31 in (152 × 78 cm)

Weight: about 4.4 lbs (2.0 kg)

Packaging: one piece

Made in Germany

About Datex

The use of our protective covers safeguards the workshop's quality and saves costs.

Each protective cover has an anti-slip, scratch-free and quick fastening system – without magnets.

This ensures a secure fit on the vehicle and prevents costly scratches by ferrous filings, which almost invariably permanently adhere to magnets. A thick foam padding provides optimum protection against dirt and damage in the event of incorrect handling of heavy parts or tools – even on thin steel or plastic body panels.

The particularly vulnerable upper edges of the fenders are perfectly protected by extra edge protection flaps and strong paddings.

More than fifty years of experience

The manufacturer looks back on decades of experience in the development of first-class protective covers based on the workshops' needs and user feedback. The protective covers are thus designed to be extremely practical, robust, and durable.

First-class materials, quality components and the most careful, solid workmanship are your guarantee for their long service life.

Developed and made in Germany in cooperation with car manufacturers
